

Biography

Sébastien Imbourg

Executive Vice President
CFM International

Sébastien Imbourg is executive vice president of CFM International (CFM), the world's leading manufacturer of commercial jet engines for single-aisle aircraft. He was named to the position in February 2018.

As part of the CFM Executive Team, Mr. Imbourg is responsible for overseeing programs carried out by the CFM joint venture. Along with his counterpart at GE, he also serves as the primary interface between the two companies. Within Safran Aircraft Engines, Mr. Imbourg is general manager of the CFM project department.

Mr. Imbourg began his career at Snecma* in 1998 as part of the commercial turbine design team in the engineering division. From 2007 to 2010, he served as chief engineer for the PowerJet SaM146 engine, where he led the certification efforts for that program. In early 2011, he was named head Snecma's Continuous Improvement department, before returning to the Engineering division as head of the design office.

From 2015 until this latest appointment, Mr. Imbourg was LEAP Program director within Safran Aircraft Engines' Commercial Engine division.

Mr. Imbourg is a graduate of the National Institute of Applied Science (INSA) in Lyon and holds a Diploma of Profound Studies post-graduate degree in mechanical engineering.

CFM, the 50/50 joint company between GE and Safran Aircraft Engines, is headquartered in West Chester, Ohio, near Cincinnati. CFM has delivered more than 34,000 CFM56 and LEAP engines to date, making it one of the most successful aircraft engine suppliers in history. The company was formed in 1974 and the current agreement extends the year 2040. For more information, visit us at www.cfmaeroengines.com or follow us on Twitter @CFM engines.
